

This is to complain against the current law suit to Indiana's law of the privacy or do not call list. This law was intended for the same companies that are now fighting it. Our own Banks and their affiliates, phone companies and affiliates were calling non-stop. If I want their or additional service I will call them on my own time instead of constantly being disturbed by ringing of the phone for services I do not need or want. Please do not let companies that we have "established business relationship" with be exempted from the do not call list.
